PROCESS INFORMATION AT YOUR FINGERTIPS

Know where and how your product is stored. Know your exact production quantities. Check out past production procedures to trace your products. Follow your production recipes with projected and real consumptions. Trace back in time to check seasonality for correct capacity production planning. Know exactly your product yield and energy consumption for performing correct cost analysis and margin calculation.

CUSTOMIZED REPORTING SOLUTIONS

Ask for any specific customization that you may need. We build special application reports according to your specifications and your production process.

ACCURATE DECISION MAKING WITH REPORTAS

Integrate real time production cost data with your ERP system and gain critical insights for better cost control and pricing decision making.

KNOWLEDGE IS POWER

PRODUCTION DATA
PROCESS OPTIMIZATION
PRODUCTIVITY INCREASE

WEB REPORTING SOLUTIONS

Follow your process traceability and provide to your administration executives high quality reporting and trends analysis all the time over the internet.

OTHER REPORTING SOLUTIONS

We can integrate REPORTAS and your SAP application, enhancing the value of your SAP data. Use the REPORTAS tools to other non-Siemens solutions. Use your own IT department or ask us to help you connect your automation system and get all the required information.

REPORTAS BENEFITS

- High quality reports
- Low cost software
- User friendly interface
- Long period process logging groups, data and alarms (relational Database)
- Data migration to intranet information systems (ERP, MES, etc)
- Fully compatible with Siemens products
- Custom reports tailored to your specific business needs

REPORTAS RELIABILITY

- Built on most common and reliable technologies (Ms SQL Servr – dot Net)
- No OPC server needed. Use your existing Siemens SCADA (WinCC, WinCC Flexible, WinCC OA)*
- Easy installation/connection with every Microsoft based system.*
- Time and Batch based reports: process ID, process values, duration, set points, statistics (min/max value, average value) and alarms.
- Documentation filtering flexibility and easy to export as .pdf, .xls, .csv, .html

*Some rules and restrictions may apply

REPORTAS STANDARD INDUSTRY REPORTS

- Food & Beverage Industry reports for: Reception, Mixing, Pasteurization, Storage, Filling, Recipes, CIP, Alarms
- Cereals Industry Reports for: Recipes, Grain, handling, Alarms
- Oil, Gas & Chemicals Industry Reports for: Process progress, Recipes, Reactors, Alarms
- Traffic Management Industry Reports for: Traffic load, Tunnel management, Alarms
