

SCADA Project Engineer

AS Automation System Hellas is certified as Great Place To Work® 2022 and a leader in the field of automatic production lines and industrial automation in Greece. To support our growing project base, we are looking for a PLC Project Engineer to fill the following position.

Position: SCADA Project Engineer

Code: SPEA_0223

Department: Industrial Automation

Terms: Full-time

Area: Athens or Thessaloniki, and at project sites (Greece and abroad)

Your tasks

- Design & development of SCADA software programs.
- Project management

The candidate **should have two (2) years of proven experience** in programming SCADA software from SIEMENS (WinCC, WinCC Flexible, TIA Portal Advanced/Professional) or another company, in industrial projects.

Requirements

- Degree in Automation Engineering.
- Two (2) years of proven experience in industrial automation projects at industrial installations.
- Very good programming knowledge of SIEMENS SCADA software
- Very good knowledge of English (written and oral).
- Excellent knowledge of Windows operating systems and MS Office applications.
- Flexible to travel in Greece and abroad.
- Driver's license.

Benefits

- Competitive full-time salary, according to qualifications and experience.
- Upbeat & friendly working environment.
- A comprehensive life and health insurance policy for employees and their families.
- Employee benefits scheme.
- Continuous education, training & opportunities for professional development, in a dynamically developing environment.
- Corporate mobile phone & use of company car.
